Summary : Free buddhist nuns and gendered practice pdf download - nirmala s salgado offers a groundbreaking study of the politics of representation of buddhist nuns challenging assumptions about writing on gender and buddhism salgado raises important theoretical questions about the applicability of liberal feminist concepts and language to the practices of buddhist nuns based on extensive research in sri lanka as well as on interviews with theravada and tibetan nuns from around the world salgado s study invites a reconsideration of female renunciation how do scholarly narratives continue to be complicit in reinscribing colonialist and patriarchal stories about buddhist women in what ways have recent debates contributed to the construction of the subject of the theravada bhikkhuni how do key buddhist concepts such as dukkha samsara and sila ground female renunciant practices salgado s provocative analysis of modern discourses about the supposed empowerment of nuns challenges interpretations of female renunciation articulated in terms of secular notions such as freedom in renunciation and questions the idea that the higher ordination of nuns constitutes a movement in which female renunciants act as agents seeking to assert their autonomy in a struggle against patriarchal norms salgado argues that the concept of a global sisterhood of nuns-an idea grounded in a notion of equality as a universal ideal-promotes a discourse of dominance about the lives of non-western women and calls for more nuanced readings of the everyday renunciant practices and lives of buddhist nuns buddhist nuns and gendered practice is essential reading for anyone interested in the connections between religion and power subjectivity and gender and feminism and postcolonialism
